Aster 

Aster, Designed To Build Emotions,
dallo Story Telling allo Story Making

Razionalismo Architettonico e Personal Mood, questa è la miglior definizione del nostro brand. Tecnologia, tecnica, perfezione funzionale, ergonomia, movimenti, sono concetti e dettagli a noi ben noti e certamente parte fondante del nostro successo.

In Aster siamo andati oltre.

Abbiamo sperimentato percorsi nuovi, affiancando alla perfezione tecnica e funzionale delle nostre collezioni, la magia e il fascino dell'irrazionalità, dell'atmosfera, della provocazione. La nostra storia parte da molto lontano. Da quando abbiamo cominciato a raccontare le nostre collezioni e ciò che di esse ci affascinava. Abbiamo raccontato il perché le abbiamo volute così. Che fossero riferite ad un particolare periodo storico oppure ad un legno pregiato. Alla crudezza e forza di un elemento in ferro

o alla dolcezza ed al fascino del glamour.

Abbiamo donato ad ognuna delle nostre collezioni una chiave di lettura, un significato, un'anima.

*Aster, Designed to build Emotions,
from Story Telling to Story Making*

*Rationalist Architecture infused with intimate Moods; the best way to sum up our brand.
We take account of the smallest of details, covering technology, technique, functional perfection,
ergo-nomics, movement, each and every one of these concepts is taken care of, perhaps this is at the
heart of the secret of our success.*

At Aster we take things just a little bit further.

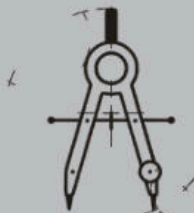

*We love to experiment, taking new paths, mixing things up by adding both a touch of the
unexpected and a hint of magic to the quality techniques and functional perfection that go into
building each of our collections.
Our story dates back to quite some time ago. From the time we first began making collections, sharing
stories to draw people in. We shared these experiences because that's how we wanted things to
be. Each individual story was shaped with reference to one historical period or another, or shaped by
one material or another, precious woods, strong powerful irons and metals, or sweet caresses given by
mo-ments of glamour.*

*With each different collection we breathed life into the stories behind them, giving each one meaning, a
reading, a soul.*

Why Aster

	PASSION Passion in developing new models, in the original and authentic interpretation of the different moods, in the relentless pursuit of beauty. We define moods, prepare all the ingredients to allow our dealers and interior designers to deliver to their customers the home that they have always dreamed to live in.
	UNIQUENESS Our collections combined with the infinite range of materials and finishes provide our dealers and interior designers with a wide design freedom. Our team of experts help to examine together all the potential custom solutions to realize unique projects for the end clients. In Aster we have managed to combine the artisan skills with the precision and consistency of the industrial production
	QUALITY The constant implementation of optimizations in the organization, the obsessive care of even the minor detail, the attention in developing new finishes, the rigorous and wide-spread control of the production process, produce a superior quality, without compromises.
	SERVICE – support / consultancy Training of the sales and technical people on Aster’s product and system, consultancy during the design and planning of the kitchen especially for the custom solution, scrupulous verification of every technical detail of the orders before launching production, possibility to access a reserved area where you can find all the information regarding your orders, are only some of the aspects of our service.
	CONSISTENCY The quality control carried out by the various operators in the production process, allows us to deliver our products precisely and timely since 1983. Our unique advanced packing system, protects the product during the transport to its final destination.
	MADE IN ITALY Our made in Italy, Why our made in Italy? Precisely because it is ours, because it is simply not true that anything “made in Italy” will necessarily be beautiful, that is how we see it. Our Italian design is born out of our culture, our history and our ability to work with different materials, and to do justice to the full potential of each material shaping it into different forms. At Aster Cucine we are proud of our heritage and proud to raise its profile showing off the best that Italian design has to offer.

Creating a new Aster product

	INFORMATION ANALYSIS Through the constant monitoring of the evolution of the society and the habits of people in their homes, we manage to catch the new functional requirements for the kitchen ambience. The attention to the various hints coming from other type of business sectors, brings us to interpret in an original and authentic manner the new trends.
	DESIGN INNOVATION Processing the information mentioned here above, we come to new ideas and innovation projects that will turn into the final design of a new collection.
	RESEARCH AND SELECTION OF MATERIALS and FINISHES At this point we begin the research and selection of materials, finishes and technological innovations
	PRODUCT ENGINEERING Simultaneously to the research of materials we start the product engineering with specific tests, perfecting the product till we achieve its final optimized version.
	PRODUCTION The new collections are now ready to be produced and introduced in the market.
	CUSTOMIZATION / MIX & MATCH - MAKE IT PERSONAL Our collections interpret the various moods with a wide range of finishes and functional solutions, allowing interior designers to express their creativity without any restriction. The finishes of the various models can be combined without any limitation for a perfect mix & match. All the above, along with the possibility to customize every single product, allows us to realize projects with a unique design for our clients.

SUSTAINABILITY

Every business should strive to make the world a better place. That's a challenge we would like to live up to. In a world of limited resources it is vital that every company does what it can to ensure that its processes and products are highly sustainable. Designing, creating and selling goods with an ethical approach is something we take very seriously. In the natural world there's no such thing as waste. Every single thing, every element in the natural world, or deriving from it, once it has finished its natural cycle returns to its origins and is reabsorbed.

ECOLOGICAL PANELS

All of our kitchens are built using panels made from tiny particles of wood (boards known as "chipboard"). Not only does this material provide great durability and stability over time, but it offers a choice that's good for the environment too. We have chosen to only use FSC certified Ecological melamine panels, ones using only reclaimed wood, guaranteeing that no new trees need to be unnecessarily felled. Wood which is simply left to rot on dumps or gets burnt releases greenhouse gases into the atmosphere, whereas by recycling wood which would otherwise have been burnt or dumped means the negative carbon impact is counteracted. For example, 1 ton of recycled wood results in reducing the release of greenhouse gases by up to 1.03 tonnes (1 ton of CO2 = is the unit used for measuring the impact of greenhouse gases on the environment).

FSC (Forest Stewardship Council)

Forest Stewardship Council is a non-profit organization that certifies responsible management of the world's forests. Any goods certified by the FSC for marketing bear the company's Chain of Custody certificate. The FSC certificate means that any wood or wood-based material used has been rigorously checked and approved by FSC to make sure all of their guidelines have been adhered to. The FSC mission statement is to work as an effective tool to influence the way the world's forests are managed so the planet's reserves of wood can be safeguarded. Thanks to the FSC (Forest Stewardship Council) certification, Aster is able to produce products with FSC certification, guaranteeing the use of raw materials deriving from correctly managed forests according to the principles and criteria of the two main standards: forest management certification (FM) and certification of the chain of custody.

CARB2 PH2 e TSCA Title VI PANELS

Formaldehyde is an organic compound often used in the glues and resins needed for the production of wooden panels. Wood-based panels are classified based on the formaldehyde gas emissions they release into the atmosphere. We have chosen to use only low-emission panels. The company buys only panels certified that complies with requirements set out by the latest CARB ATCM II Phase 2 and TSCA Title VI (Toxic Substances Control Act) according to EPA standards (US Environment Protection Agency) and periodically check that these limits are respected with rigorous laboratory testing. According to the CARB II PH2 e TSCA Title VI classification, the maximum content of formaldehyde must be no greater than 0,09 ppm (parts per million), as a matter of fact the products that we deliver to our customers have completely lost nearly all of their formaldehyde emissions.

TSCA Title VI
COMPLIANT

Domina

La leggerezza delle forme.

Composizioni che occupano gli spazi e che divengono parte dello spazio stesso.

La perfetta integrazione tra design e funzionalità. Un percorso guidato da linee essenziali che l'occhio riconosce come proprie.

Light forms.

Each composition fills spaces and in turn becomes part of the space itself.

A perfect blend, where design meets function. Taking you on a tour, offering a sense of true belonging as you feast your eyes on these essential lines.

E' l'immaginazione l'unico limite alla versatilità.
Atelier presenta un'ampia gamma di superfici: bellissime, resistenti e di eccezionale
naturalità. Un'infinita possibilità di progettazione rende unico ogni ambiente.

Where the only limit is your own imagination.
Atelier comes in a wide range of surfaces: all great-looking, natural, and highly du-
rable. Offering a myriad of design choices to create your very own unique kitchen
space.

CONOSCENZA

Ecco che l'emozione lascia lo spazio alla ragione. Contempora è lo stato dell'arte. Contempora è oggi l'evoluzione che avviene partendo da un nucleo stabile di conoscenza. Perché solo attraverso la grande conoscenza della materia si può realizzare Contempora. Ogni passo avanti è una rilettura del nostro passato, interpretato nel presente, proiettato nel futuro. Mai una mutazione occasionale. La luce è guida, interpretazione, calore. Raccoglierla nell'Universo per liberarne lo splendore nell'intimità di un momento.

KNOWLEDGE

This is where passions give way to reason. Contempora is state of the art. Contempora today shows the triumph of evolution, developing from its knowledge-based core. It takes a deep knowledge of materials all brought together to make Contempora. With each step forward, we still remember the lessons of our past, interpreting the present, working towards the future. No single alteration is a mere act of chance. A guiding light, pushing us forward, helping us add new meaning, extra warmth. Gathering the whole Universe to free the intimacy of a fleeting moment in all its splendour.

Contempora

Il legno, il cemento, le pietre, i metalli: materia pura, ideale per definire ciò che è essenziale. Piacere per gli occhi e invito alla sensazione tattile.

Wood, concrete, stone, metal: pure materials, ideally matched to define the essence of simplicity. For great looking design you'll want to reach out and touch.

Contempora

Esprime l'essenza dei materiali e la purezza delle forme.
Il legno pregiato dialoga perfettamente con le laccature e la pietra naturale.
Una moderna armonia estetica e funzionale.

Celebrating essential lines, materials and purity of form.
Where sleekly sophisticated wood forms a perfect dialogue with polished lacquered finishes and natural stone.
For a highly functional modern yet harmonious look.

Atelier

La modularità ridisegna gli spazi, definisce in modo personale e unico gli ambienti. La funzionalità di Atelier si coniuga con le esigenze del nostro tempo, con i bisogni del tuo tempo.

With its modular take on redesigning space Atelier allows you to create a look in keeping with your own taste and the available space. Atelier's easy functionality blends with today's modern necessities, as well as meeting your own personal needs.

Brera Academy

La contemporaneità e internazionalità dell'essere "Made in Italy".
Le linee geometriche della collezione, creano giochi volumetrici che enfatizzano la tridimensionalità dell'anta.

Le colonne funzionali con ante a diverso spessore, creano un gioco di luce e profondità, trasformandosi talvolta in una boiserie a parete.

The contemporaneity and internationality of being "Made in Italy".
The geometric lines of the collection create volumetric games that emphasize the three-dimensionality of the door.
Functional columns and doors with different thickness create a play of light and depth, sometimes turning into a wall paneling.

Atelier

Offre al mondo esterno la tua visione del vivere, aperta alle possibilità, versatile, accogliente e insieme riservata quanto basta. Spazio da vivere e condividere. Atelier definisce il quotidiano, dove bellezza ed efficienza dialogano, si completano, vivono insieme a te.

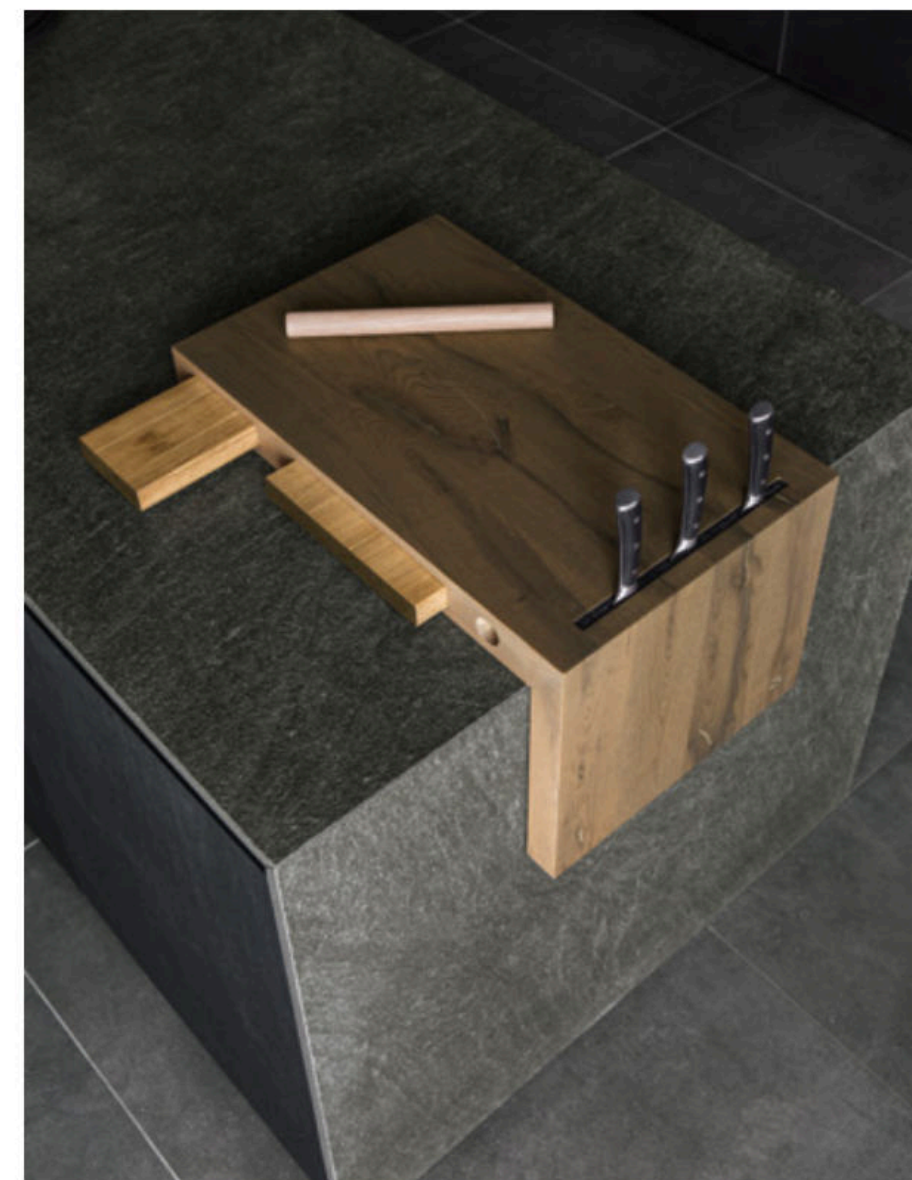

Helps you show the world your vision when as you create a versatile living space open to multiple possibilities allowing you make it as welcoming or reserved as you like. For a living space you can share and enjoy. Atelier defines your daily life, with practical features that still let beauty shine in a harmonious ongoing dialogue.

FACTORY

The Timeline kitchen system is astonishing piece of design and the ultimate in functionality.
La collezione Timeline è uno "masterpiece" del design unito alla più innovativa funzionalità.

Outdoor

La natura si prende sempre il suo tempo. Prendiamocelo insieme. La collezione "Outdoor" è disegnata per resistere nel tempo. Realizzata con materiali ideali per vivere all'esterno. Legno di Iroko. Acciaio e gres porcellanato. Pietra naturale. Tecnologie per la cottura weatherproof. "Outdoor", è destinata a durare nel tempo.

Nature always takes its time. Let's take our own together. The collection "Outdoor" is designed to stand the test of time. Made with materials perfect for living outside. Iroko wood. Stainless steel and porcelain stoneware. Natural stone. Weatherproof cooking technology. "Outdoor" is intended to be last over time.

Dettagli importanti
 Il legno di iroko è caldo e avvolgente. Ideale per l'uso in esterni.
 Le casse dei mobili in acciaio sono garanzia di durata.
 La pietra e il gres porcellanato sono l'accento creativo.
 E durante le stagioni più inospitali una copertura dedicata preserva la bellezza e la pulizia di "OUTDOOR".

Aster "Outdoor"
 Designed to Build Emotions, Inspired by Nature

Important details
 Iroko wood is warm and encompassing. Ideal for the outdoor use.
 The stainless steel body of the elements guarantees a long life.
 The stone and porcelain stoneware are the creative touch.
 And during the roughest weather, a dedicated covering protects the beauty and the neatness of our "Outdoor".

Blok ghisa

1 - 220.000 possible combinations

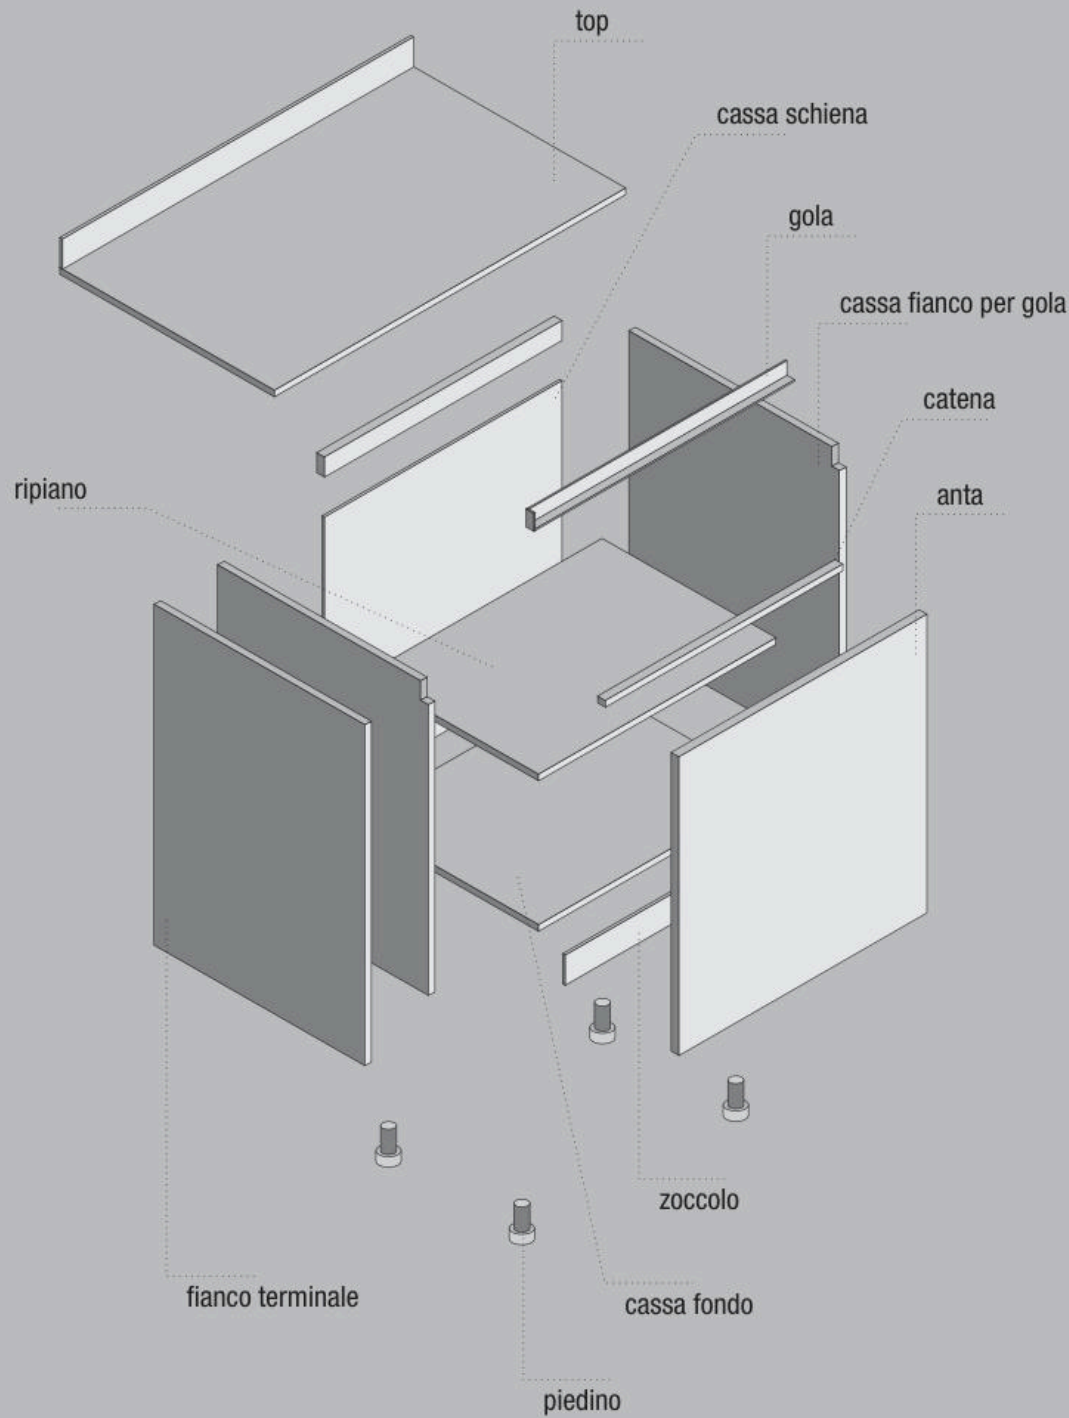

Our range of products offers 6 different depths, 6 heights for base units combined with 3 heights of feet, 8 heights of wall cabinets, 7 heights of tall units (columns), 6 thicknesses of worktops. A total of almost 220.000 combinations that allow to meet every need in terms of ergonomics, storage and organization during the design process of the kitchen.

Structure

2 - Top class structure of cabinets

The carcasses of our kitchens are engineered and made with specs thought to reach the maximum results in tem of robust-ness and solidity, granting their durability during time.
The box is available in 4 colours: bianco (white), linen, anthracite (anthracite) and rovere naturale (oak).
It's made out of 18 mm. thick ecological panels of wood particles thermally fused with non-toxic textured melamine, with back panel 8 mm. thick, feet with three pins.
All the panels are edge banded with 1,5 mm thick ABS edge band, glued and sealed with polyurethane glue for the best results against humidity and heat. Every base unit has aluminum crosspieces in different color (aluminum, white and anthra-cite), while wall cabinets have concealed hanging brackets. All the cabinets have internal shelves equipped with supports that locks them in their position to prevent any fall off, covers of mechanisms in color match, fitting joints anthracite for the cabinet anthracite and st. steel any other color. The back panel of base units and tall units is positioned 68mm forward while the bottom is 50mm forward from the end of the side panels, to create more than enough space for cables and pipes. The internal shelves are 18 mm. thick granting a high load capacity. However is possible to increase the load capacity, by strengthening them with an anti-bending aluminum profile (standard for widths beyond 90 cm.) or, as an alternative, orde-ring the internal shelves 30 mm. thick. Upon request are available structures in plywood made of phenolic birch wood stained or lacquer in 5 colors or in stainless steel AISI 304 o 316

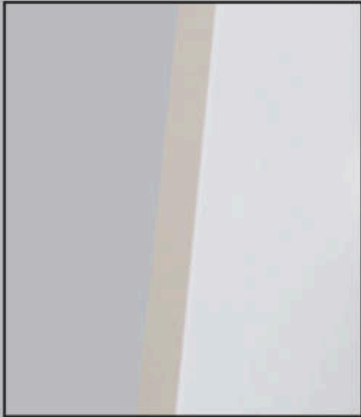

3 -Wall cabinets for doors with handles

The stiff back panel (8 mm.) makes the structure of our wall cabinets much more solid compared to cabinets with thinner back panels (3 or 4 mm.).

5 - Base units for doors with handles

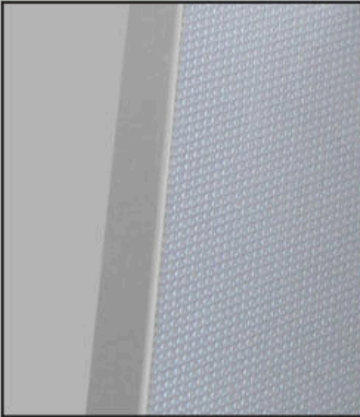

The robustness of our base units is granted not only by the back panels 8 mm. thick, but also by the crosspieces in aluminum that are installed in every type of base cabinet. The front crosspiece is combined with the color of the carcass: white white, aluminum with linen or oak, anthracite with anthracite.

Structure - Bianco

Structure - Linen

Structure - Antracite

4 - Wall cabinets with channel

The solidity of the wall cabinets is reinforced by the aluminum channel installed in front of the bottom. Supplied in ghisia color combined with cabinets anthracite and aluminum with the other cabinet colors.

6 - Base units with channel

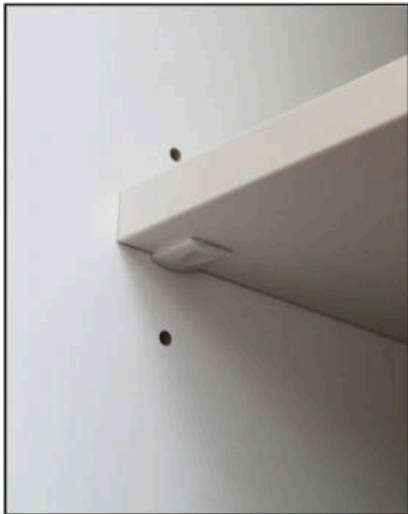

Base units for channel are shaped in the front part of both sides in order to fit the aluminum channel through the whole base units run. We apply a rubber paint on top of the cut to increase the resistance to humidity.

11 - Internal shelves

Internal shelves are fixed with supports that locks them in their position to prevent any fall off, positioned concealed within the thickness of the shelves themselves. White color combined with white cabinets, grey with linen and oak, anthracite with anthracite.

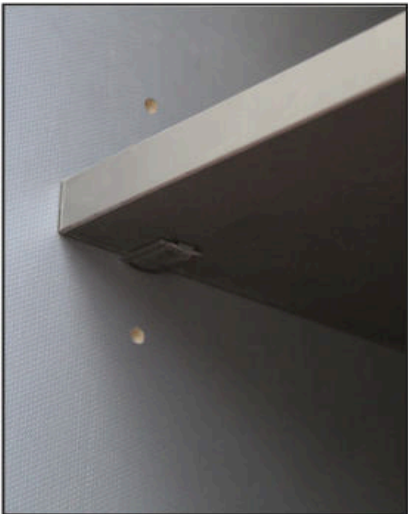

White internal shelves

Grey internal shelves

Antracite internal shelves

12 - Glass shelves 8 mm thick

The internal glass shelves are made of clear glass

Internal shelves steel supports

Internal shelves antracite supports

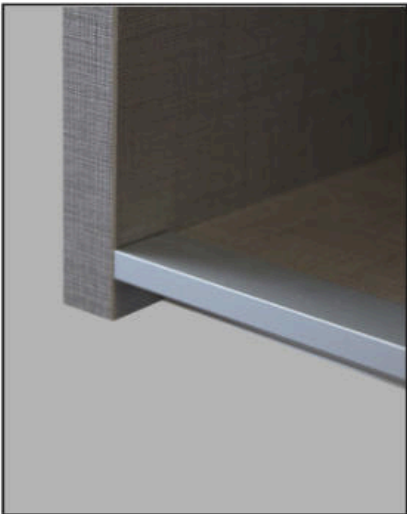

13 - Channel for wall cabinets

In the wall cabinets for doors without handles we install an aluminum channel in the front of the bottom to allow an easy opening of the door. The channel is in aluminum color combined with the white, linen and oak cabinets, ghisa with anthracite cabinets.

Aluminum channel

Aluminum channel

Ghisa channel

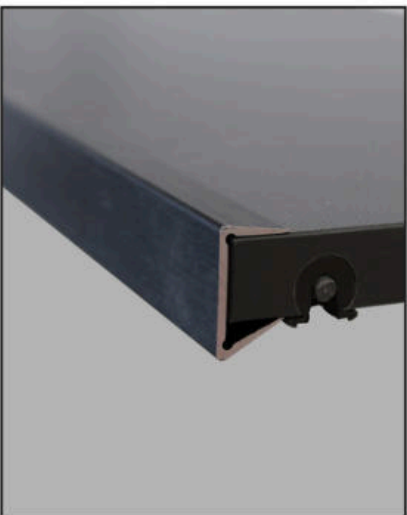

14 - Anti-bending aluminum profile

In every cabinet wider than 90 cm. we install an anti-bending aluminum profile to strengthen the internal shelves. In the wall cabinets the profile is installed in front of the shelves, in base units and tall units in the front and rear of the internal shelves. Upon request the profile can be installed in every cabinet. It is in aluminum color combined with the white, linen and oak cabinets, in color anthracite with anthracite cabinets.

Anti-bending aluminum profile

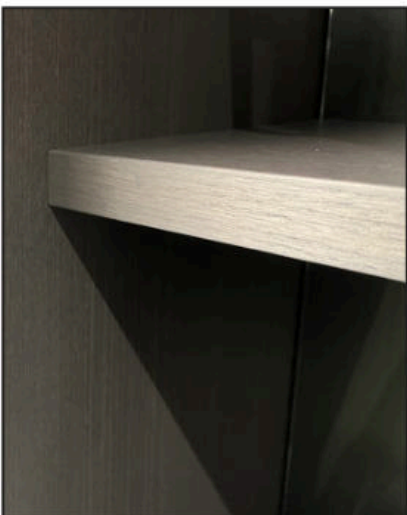

Anti-bending profile antracite

15 - Thicker internal shelves

It is possible to order internal shelves 30 mm- thick to increase the loading capacity of the shelves themselves.

27 - Channels

Doors can be opened installing handles or knobs chosen from the wide range of options available or with solutions push-pull (touch latch). As an alternative, for a modern and minimal design, we provide several solutions with channels.

-Horizontal/vertical "C" channel (G-bar) in aluminum (superior h.5 cm., central h.7,5 cm., for vertical consider an increase of 3 cm. in width) available in the following colors: aluminum, glossy white and ghisa. Upon request the same channel can be ordered titanium or finished same as doors for a perfect match.

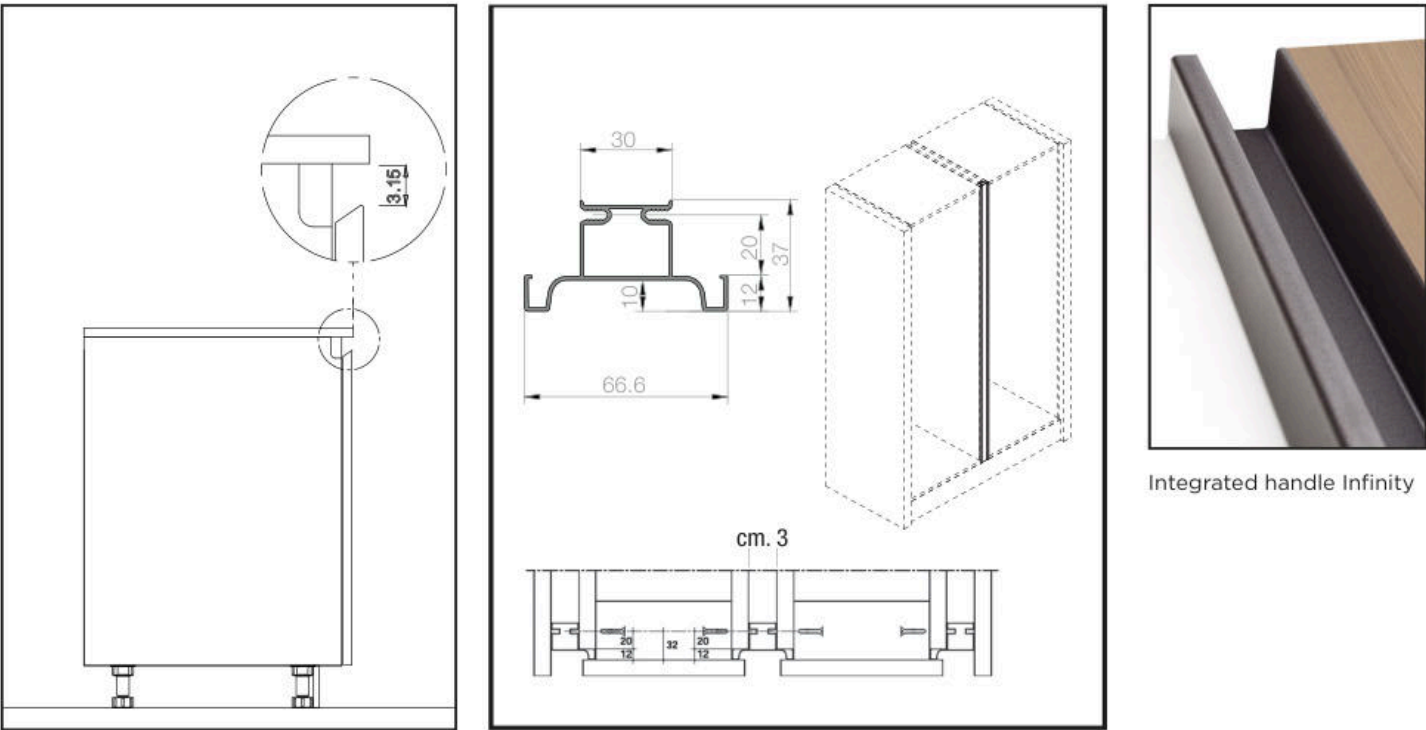

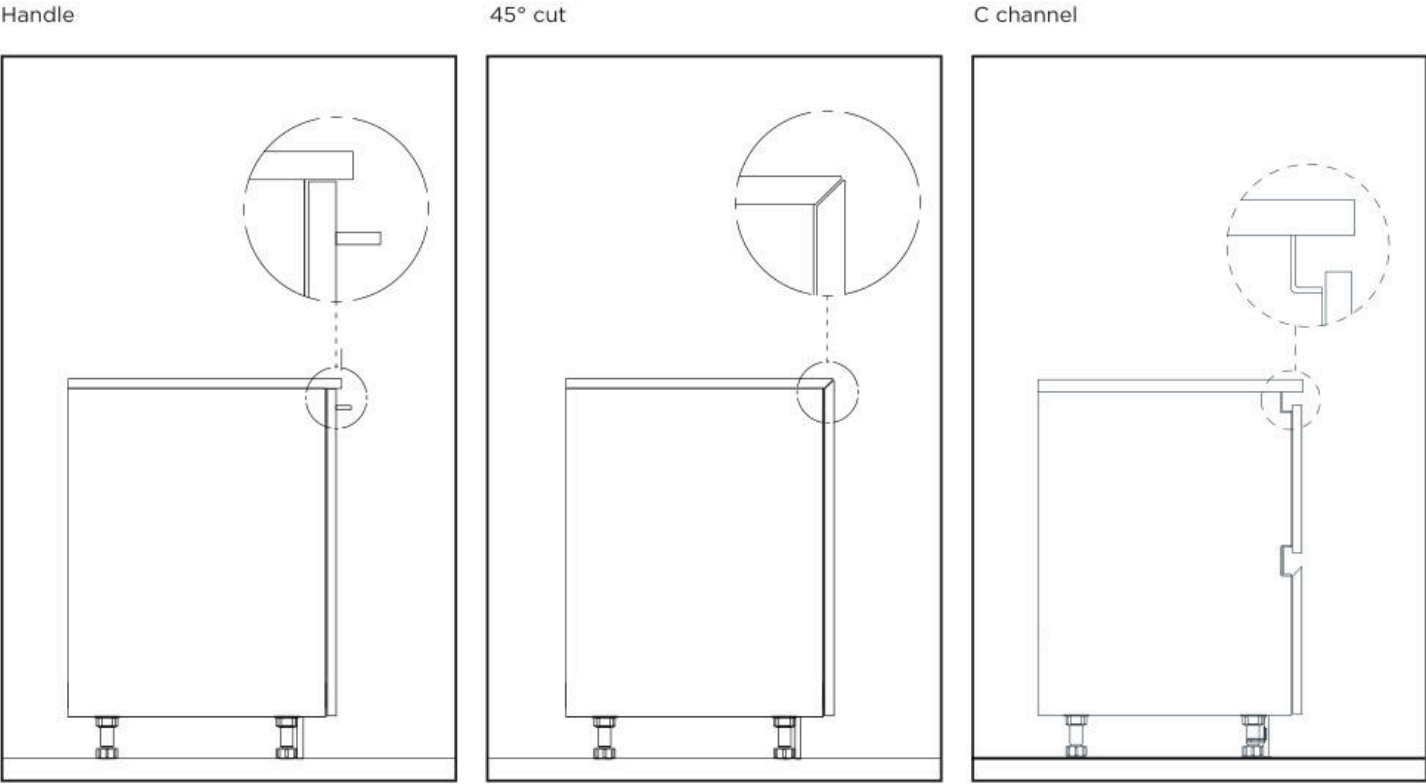

-Horizontal/vertical "Flat" channel in aluminum (superior h.5 cm., central h.7,5 cm., for vertical consider an increase of 3 cm. in width) available in the following colors: aluminum, glossy white and ghisa. Upon request the same channel ca be ordered titanium or finished same as doors for a perfect match.

For both of these options we supply caps and corners free of charge.

-Since it is not possible to produce aluminum Flat channels in some materials/finishes, in order to complete the offer, we make Flat channels in a material similar to the actual door.

Horizontal/vertical "Flat" channel in texture decors/melamine, Ultramatt, laminate unicolor, Fenix (superior h.5 cm., central h.7,5 cm., for vertical consider an increase of 3 cm. in width). Upon request also in stone, gres, lacquered metal effect, wood retrivo, senior brown and rovere antico. For these Flat channel there are no caps and corners.

In any case we suggest to add additional panels when the unit with the channel has one side visible.

Flat channel + 35° cut

Metal flat channel

Channel finished same of door

29- Back spacer for vertical channel

Vertical channels are supplied with a 3 cm. thick spacer to be positioned on the back of the channel in order to keep a perfect alignment of the units alongside.

31 - CDrawers

We install drawers and baskets (deep drawers) grey orione full extension and soft-closing by Blum, as a standard. The runners are 50 cm deep, allow to adjust the front horizontally and vertically, loading capacity 40 Kg. for drawers with width up to 90 cm., 70 Kg. For drawers larger than 90 cm. Guaranteed for more than 100.000 opening/closing cycles. Drawers and baskets are also available in white, black and st.steel color. With Base units and tall units with sides 66,2 cm. deep it is possible to order deeper runners 60 cm. deep. They are easy to uninstall and install back, without the need of any tool, for easy maintenance. Drawers and baskets can be equipped with the technology Tip-On Blumotion by Blum that allows the opening by a gentle pressure on the front door and the usual soft-closing closure. For a more comfortable use it also possible to install the automatic opening system Servo-Drive by Blum, an electronically assisted opening system that allows to open completely the drawer/basket with a gentle pressure without using your hands when you are holding something or they are not clean.

32 - Detail of colors of drawers

Wood drawers

33 - Dove tail solid wood drawers/baskets

Upon request it is possible to install dove tail solid wood drawers and baskets with 4 sides 12 mm and the bottom 8 mm veneered. They are installed on runners by Blum with the same specs mentioned in the above dedicated section. Available in oak and Canaletto walnut

Oak drawers

Canaletto walnut drawers

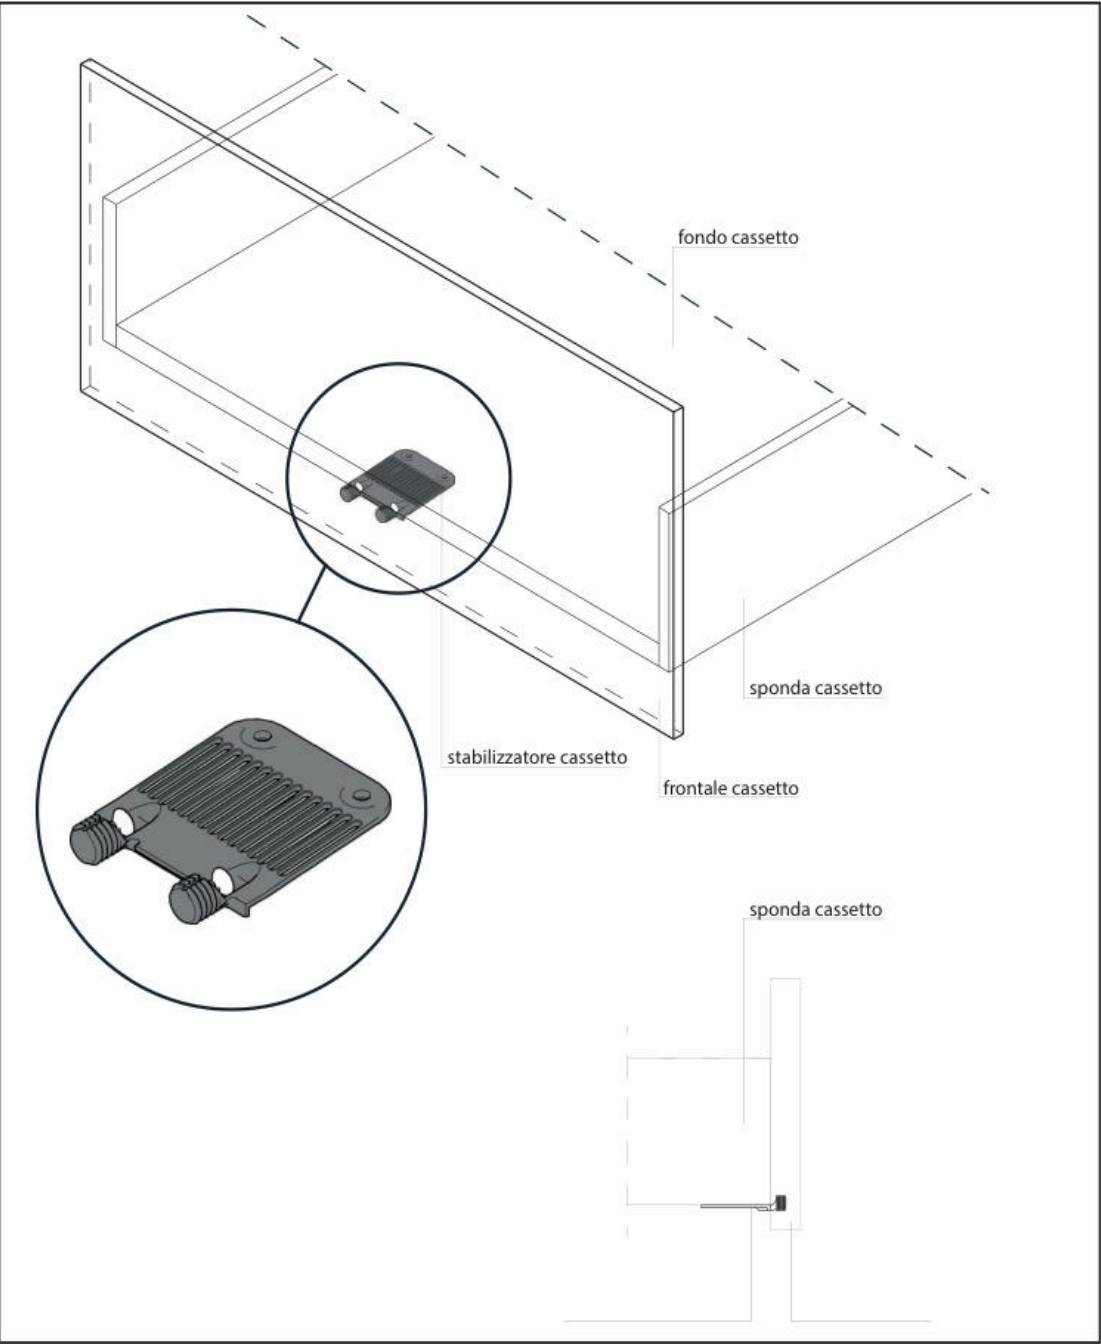

Detail solid wood drawers

34 - Additional support for drawers

An additional support device is installed in baskets wider than 60 cm. and drawers wider than 75 cm. to strengthen the bottom of drawers/baskets preventing their bending at maximum load.

Cabinet finishes

39 - The structure

The structure of the cabinets are made of ecological panels of wood particles thermally fused with non-toxic textured melamine in four colors

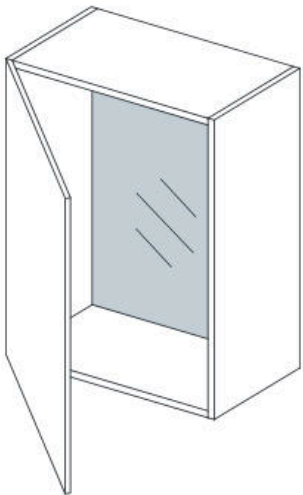

40 - Structure finishes same as door fronts

The structure of the cabinets can be made in the same finishes of the door fronts

41 - Mirror interior back panels

Upon request the back of the cabinets can be a mirror (standard, bronze e fumè)

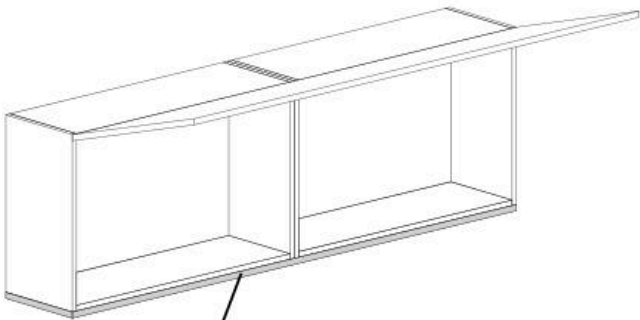

42 - Finished sides same as doors

Cabinets can be made with the exposed sides in the same finish of the door fronts. For textured melamine and melamine doors this option is available free of charge. Metal covers are also available to cover the sides in combination with metal doors.

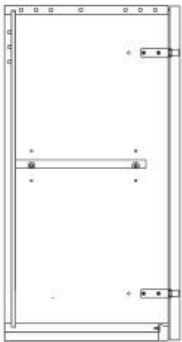

43 - Bottom/ceiling finished same as doors

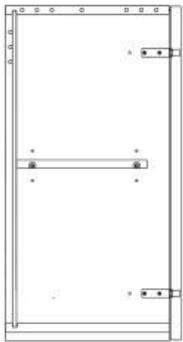

The bottom and the ceiling of wall cabinets can be finished same as door fronts. We reduce the sides of the cabinets allowing the insert of a panel 18 mm thick in the same finish of the door. With this solution it is mandatory to add side panels on any exposed side.

Aluminum frame doors

48 - Glass options

In the aluminum frames we can install 8 different types of glass: transparent, satin, bronze, fumè, reflecting bronze, reflecting warm grey, pixel, retinato (Factory). A unique wide range of options

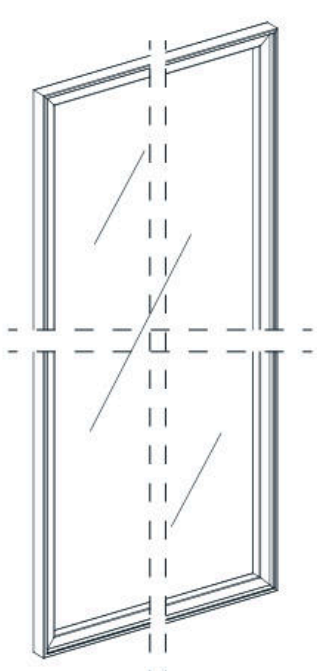

49 - Aluminum glass frame doors customizable dimensions

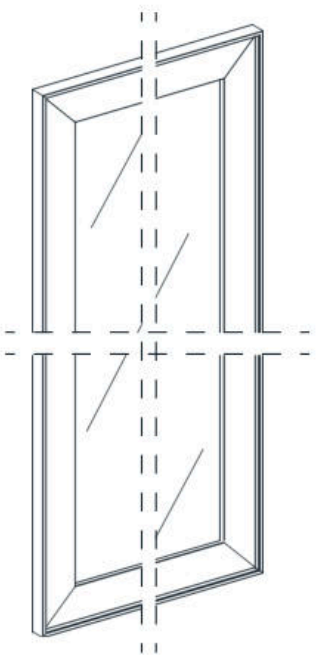

It is possible to customize the dimensions of the aluminum glass frame doors (Slide frame only customizable in height).

Frame Slide

Frame 2x2

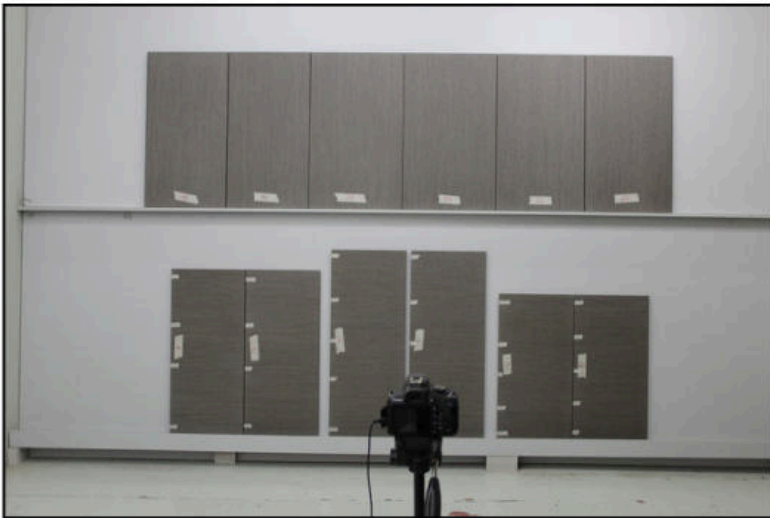

Frame 4,5x2

Wood veneered doors

50 - Our wood veneer doors

Our wood veneer doors are the result of a strict selection of the raw material. We research and select only the best lots of woods available (in order to better understand we are talking of the very best 200 - 500 sq. meters available in Italy) and we stock them with the proper care. The wood veneer slats are then masterfully cut and combined together to achieve the best aesthetic result. This is true for the most difficult to source exotic woods, but above all is true for the most common wood types such as oak, elm and walnut.

51 - Book matched wood veneered doors

The wood veneered doors are all made using wood coming from the same tree in order to grant the maximum homogeneity of vein pattern and color. In addition the wood veneer is book matched to create a continuous design through adjacent doors.

Wood veneered doors

52 - Wood veneer edge banding

We do not use engineered industrial edge rolls, but we edge band our doors and panels with the same veneer that we use for the front and back of doors in order to grant the best uniformity and quality of the final product.

53 - Book matched edge banding

Frontal edges of additional side panels can be made with horizontal veins matching the horizontal pattern of the doors.

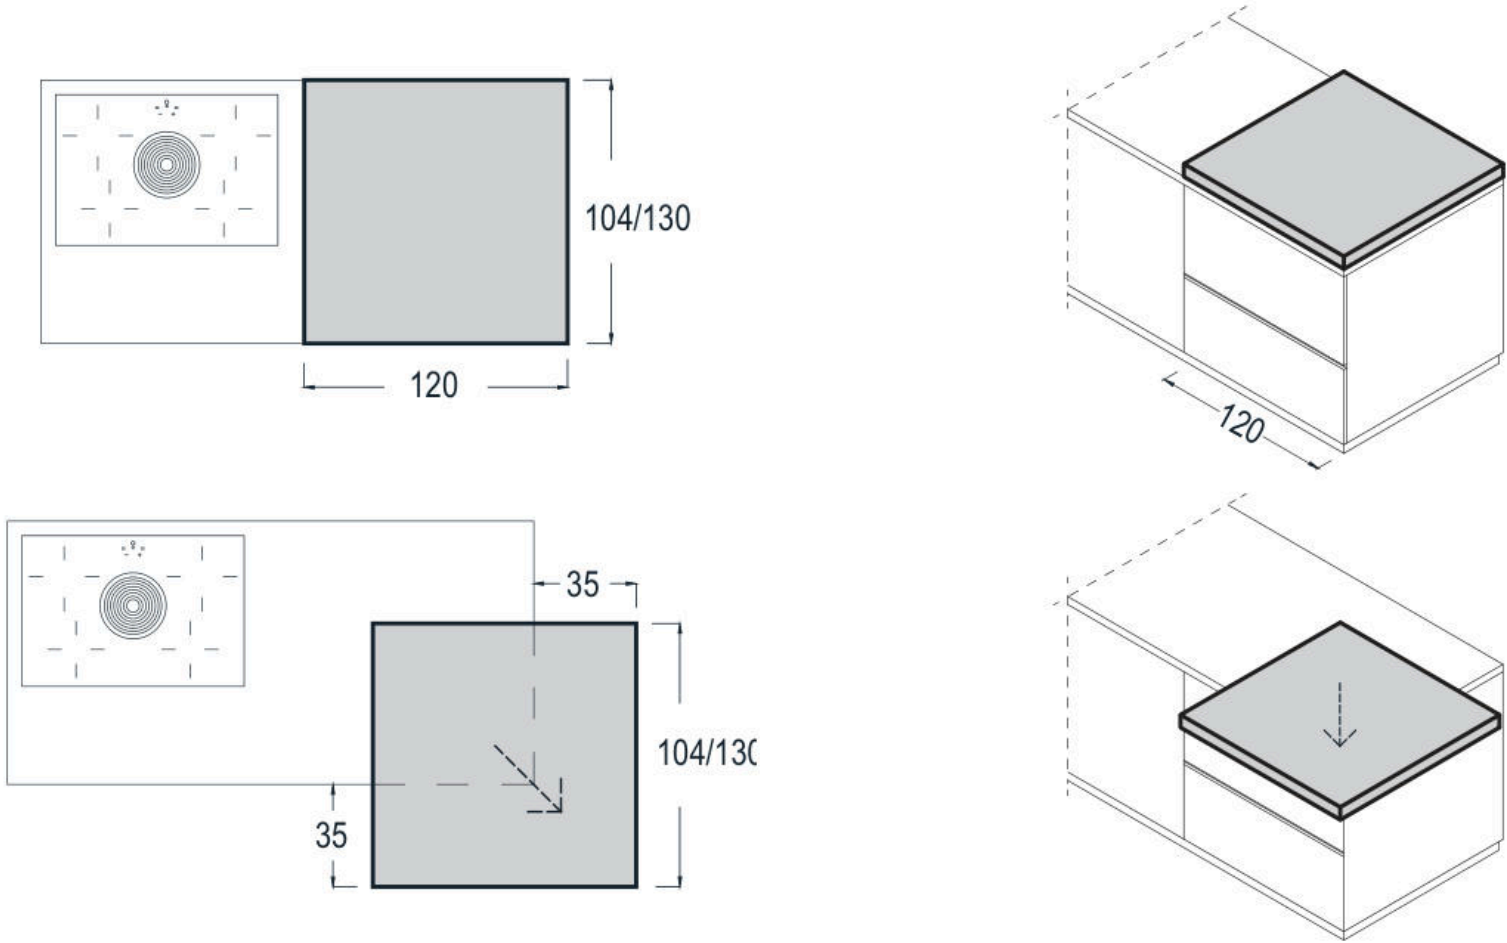

54 - Wood veneered doors high gloss polyester

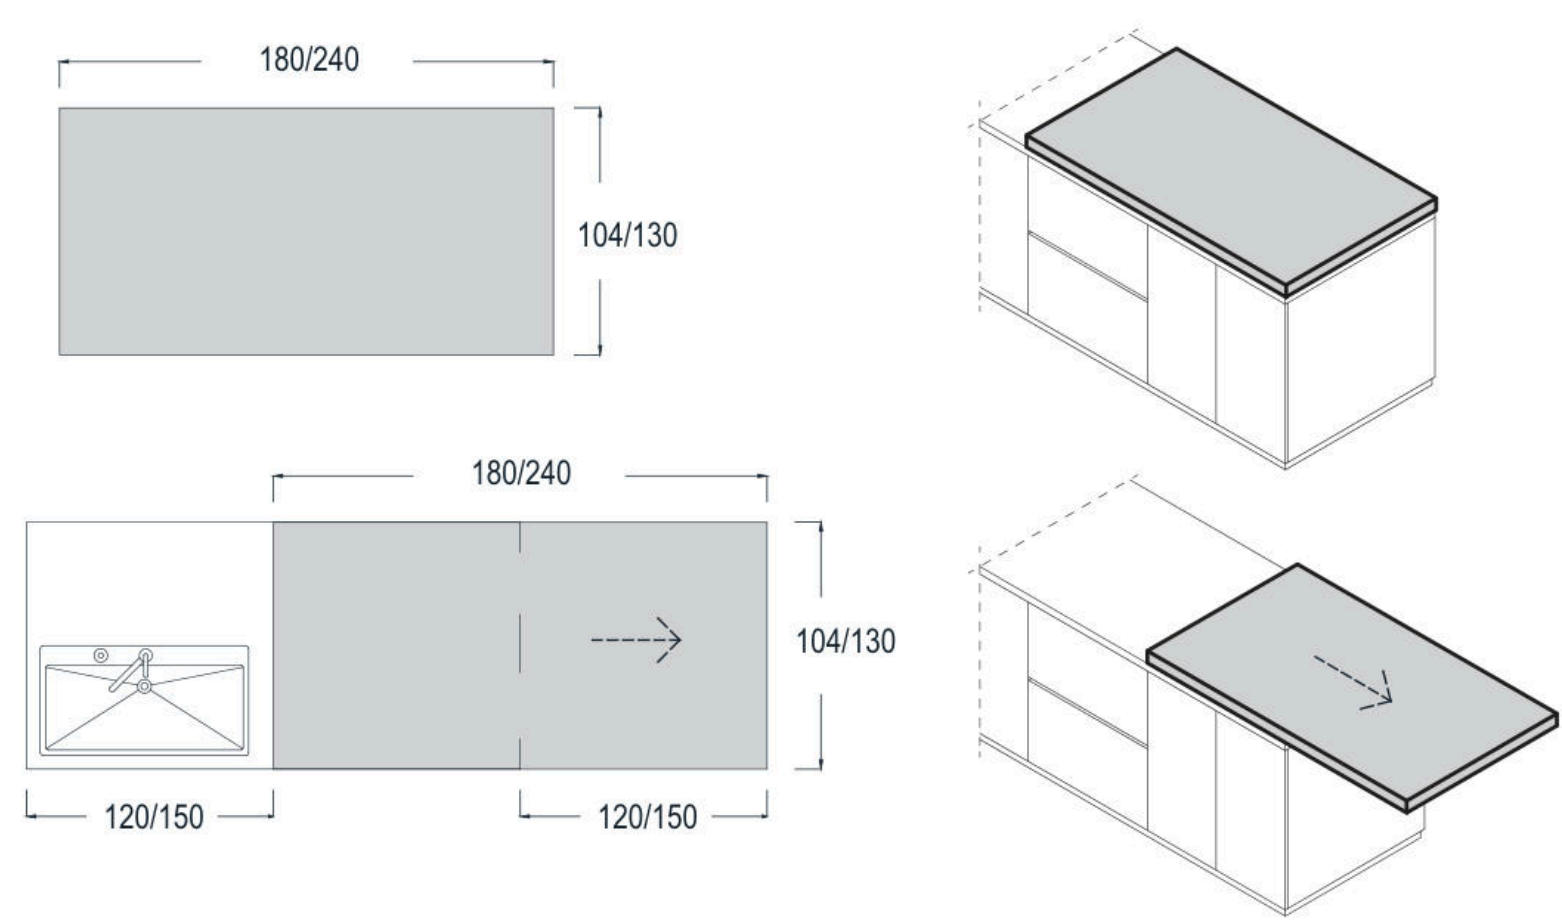

High gloss wood veneered doors are painted with various steps of polyester and brushing in order to grant the best brilliance and resistance to scratches.

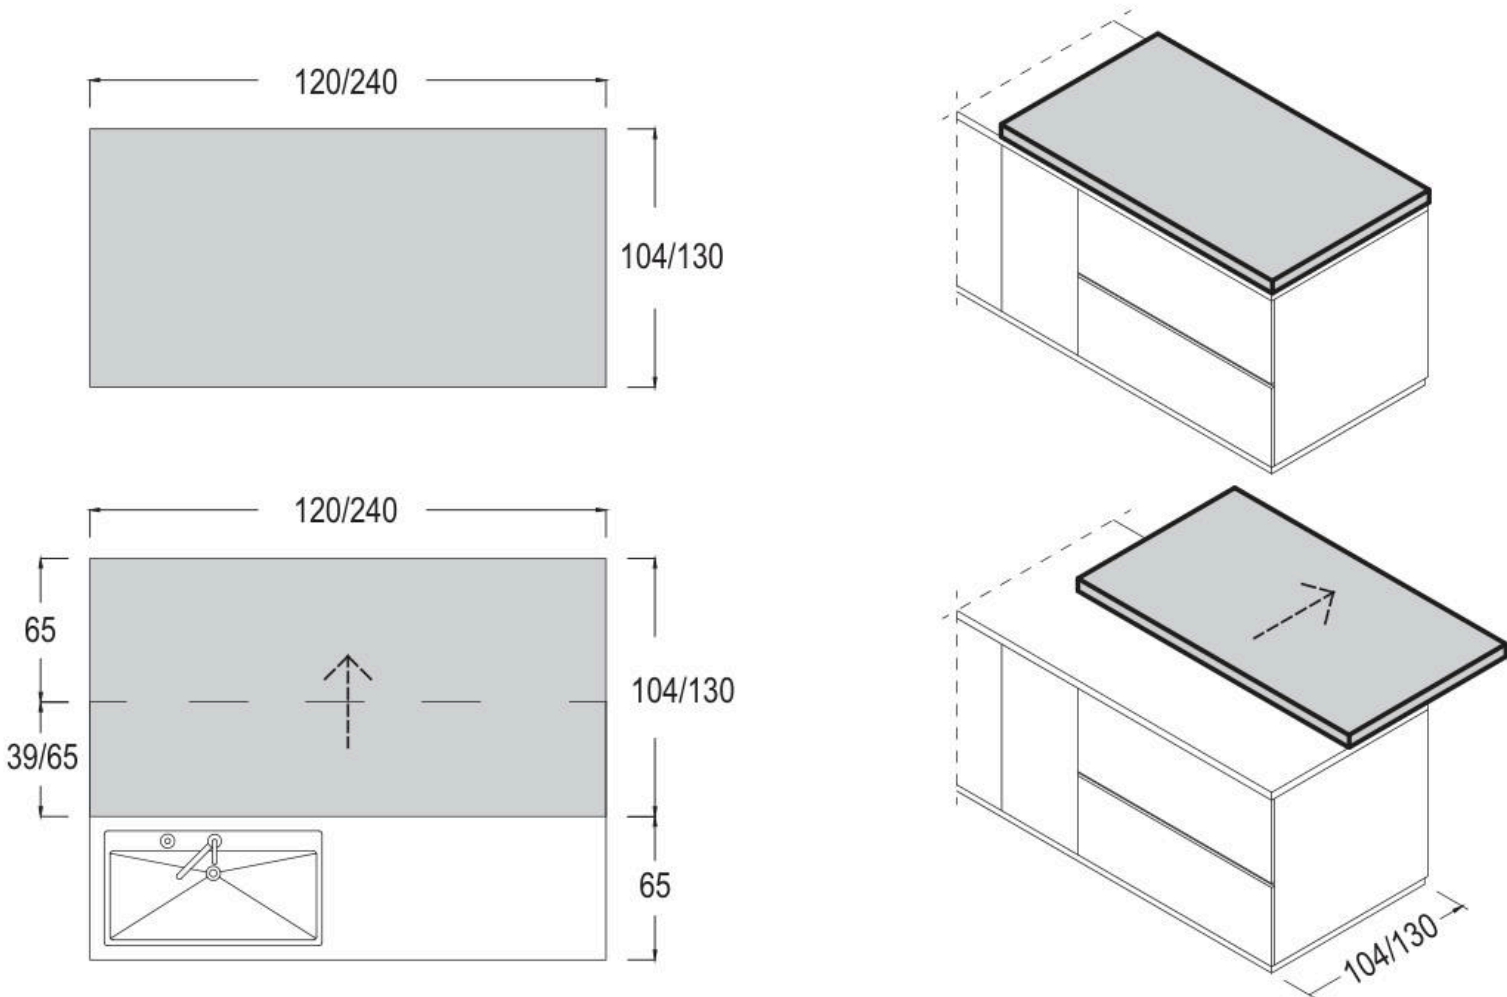

96 - Slide

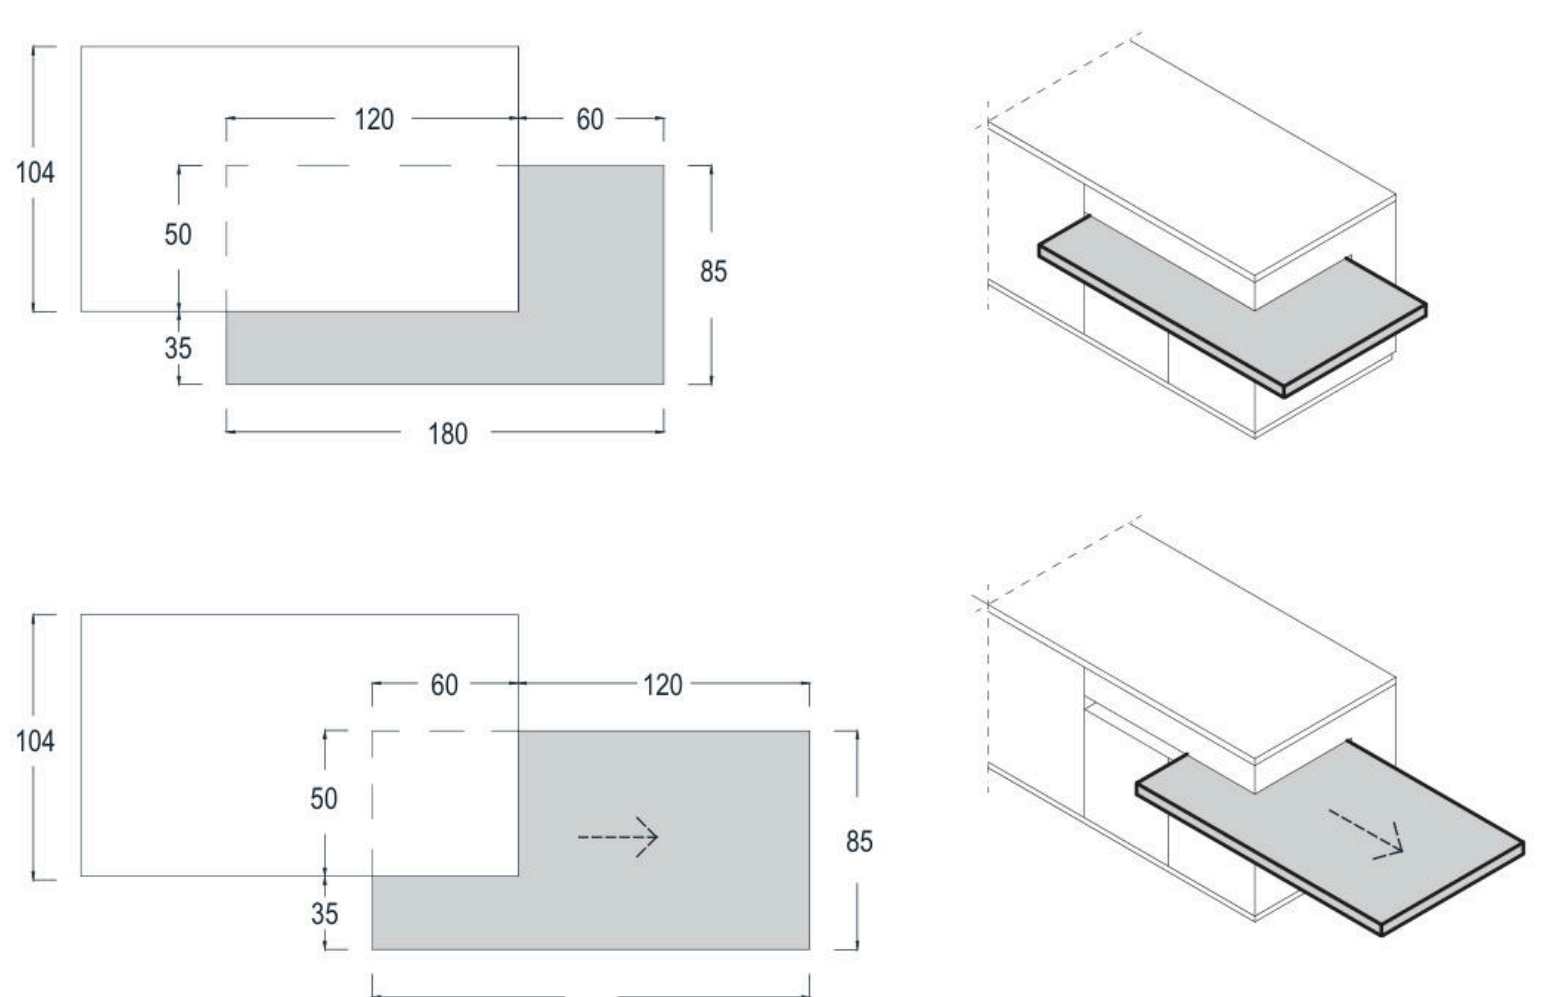

98 - Side

97 - Smart + Smart Slim

99 - Table Side

Hinges

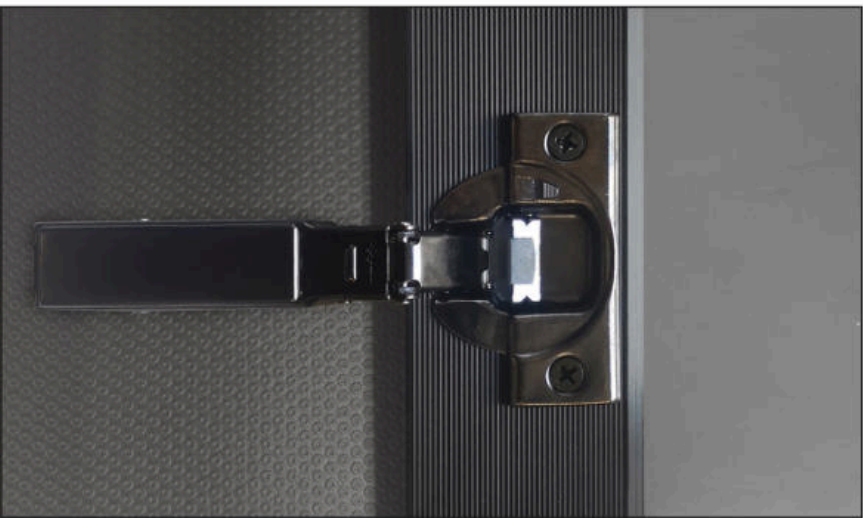

35 - St. steel hinges by Blum

Blum hinges for very thick doors are tested for 100.000 opening/closing cycles and allow an opening from 95° to 155° according to the different cabinet. They are adjustable on 3 axes, have an automatic clamping system and are equipped with a soft-closing system which allows the damper to close. Mounting plates are horizontal and hidden by the hinge for the best design and functional solution. They can be easily installed and uninstalled without any tool

36 - Onyx black hinges by Blum

We install the black Onyx hinges by Blum in all the cabinets with glass aluminum frame ghisa, 4,5x2, 2x2, Slide as well as Frame 21 /52 in the Factory collection. Upon request and subject to the approval of our technical department, the hinge Onyx can be installed in all the cabinets

37 - Push-pull (touch-latch)

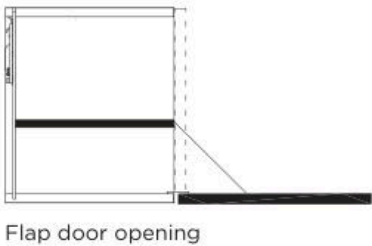

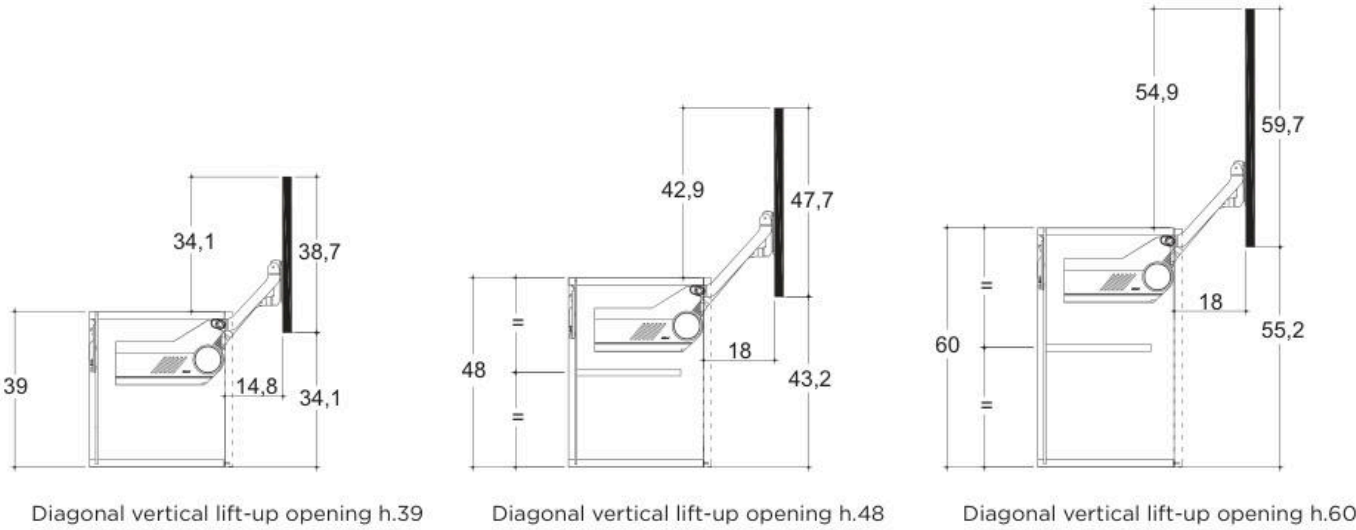

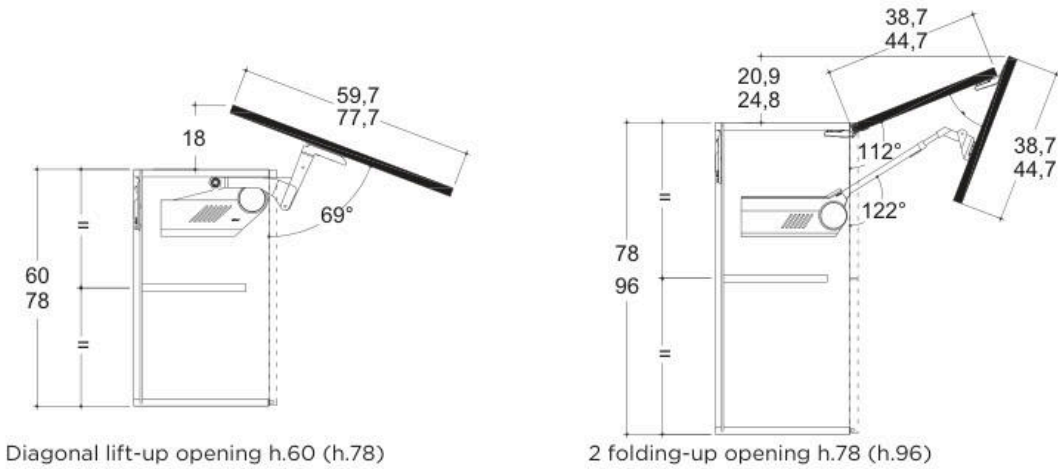

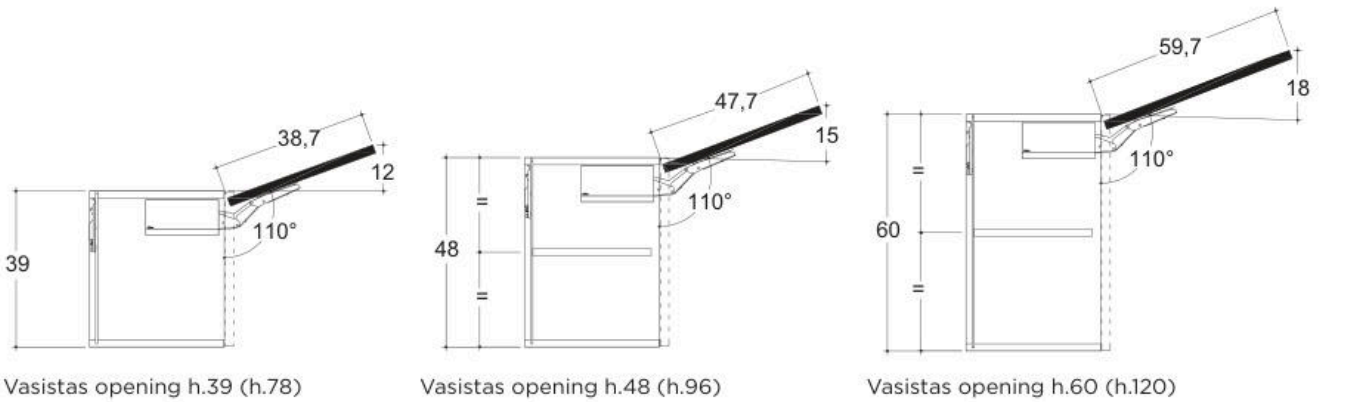

The doors can be also opened with a gentle pressure on the front using the Push-pull technology based on a piston integrated on the structure of the cabinet. In this case the Blum hinges are push-to-open type.

Hinges

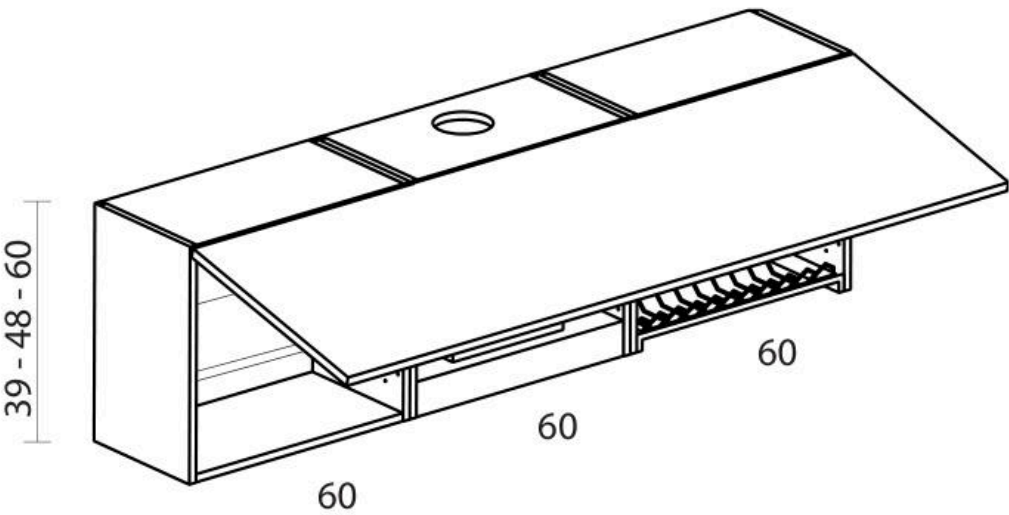

38 - Opening systems for wall cabinets

Wall cabinets can be equipped with different lift-up and flap mechanisms in order to provide the best functionality and comfort. In fact lift-up openings bring the doors above the head of the user offering the maximum freedom while operating in the kitchen. Pivot lift-up, parallel lift-up, bi-fold, up and over are all mechanisms with the most advanced technology by Blum, granted for 80.000 opening/closing cycles. The same mechanisms can install the automatic opening system Servo-Drive by Blum, an electronically assisted opening system that allows to open the door with a gentle pressure, close it with the control button or even with a remote control. Wall cabinets can also open and closed synchronized. Lift-up mechanisms can also be opened with the technology Tip-On by Blum where a gentle pressure opens the door enough to grab it and lift it up.

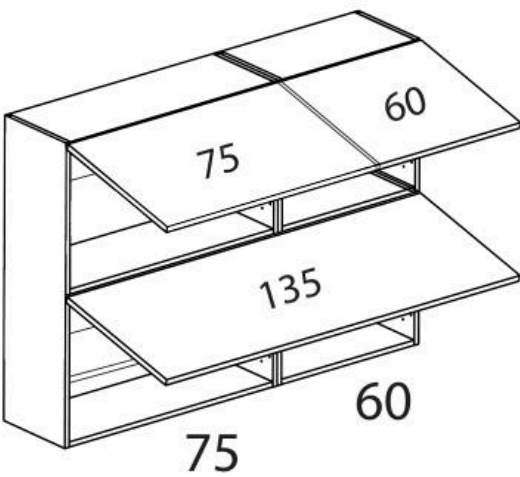

74 - Wall cabinets 150-240

Wall cabinets h.39/48/60 with a single door 150 - 240 cm. are available in several combinations of internal cabinets in terms of width and typology (plate drainers, hoods, etc.). It is also possible to make wall cabinets h. 78/96/120 with 2 single lift-up doors (max 240 cm) combining 2 lift-up wall cabinets h.39/48/60 and adding a small supplement for door cut.

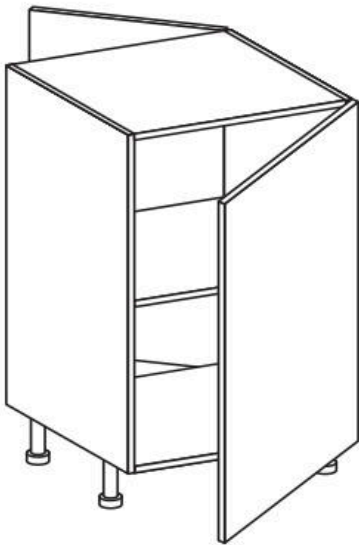

75 - Base units and tall units with opening on both sides

It is possible to order base units and tall units that can be opened on both sides.

76 - Wall cabinets with 2 doors on top of each other and whole sides of the cabinet

Wall cabinets with 2 doors on top of each other and whole sides of the cabinet are available in h. 78, 96 and 120 cm.

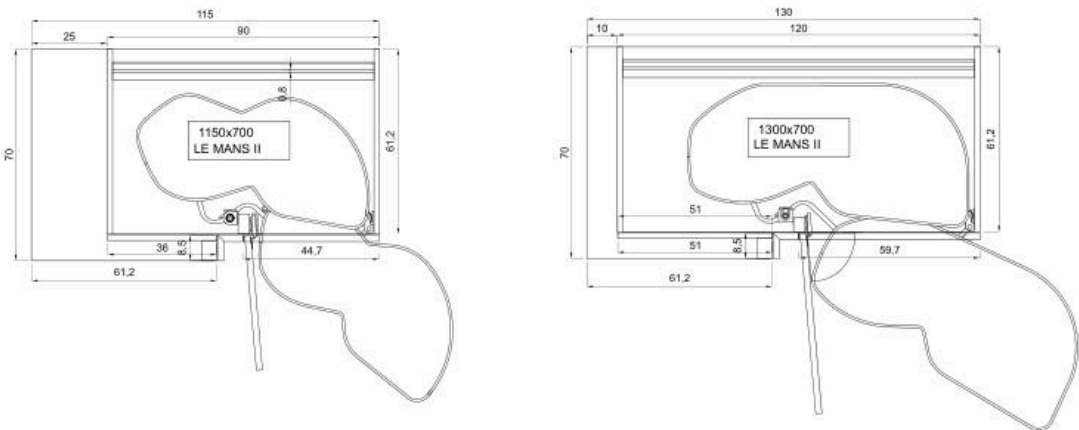

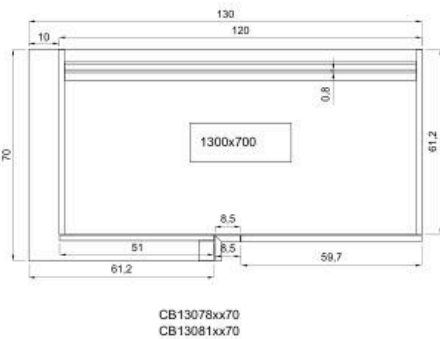

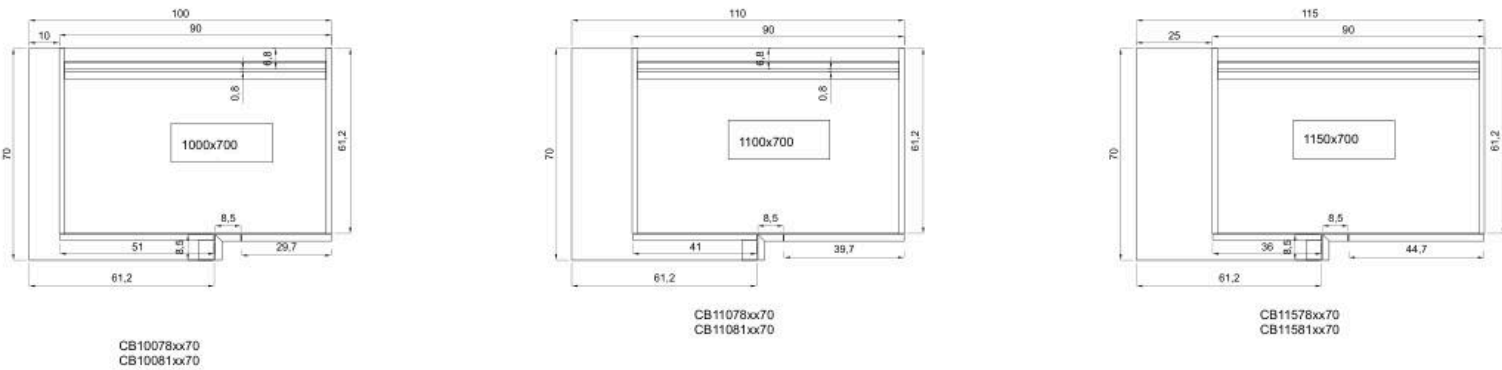

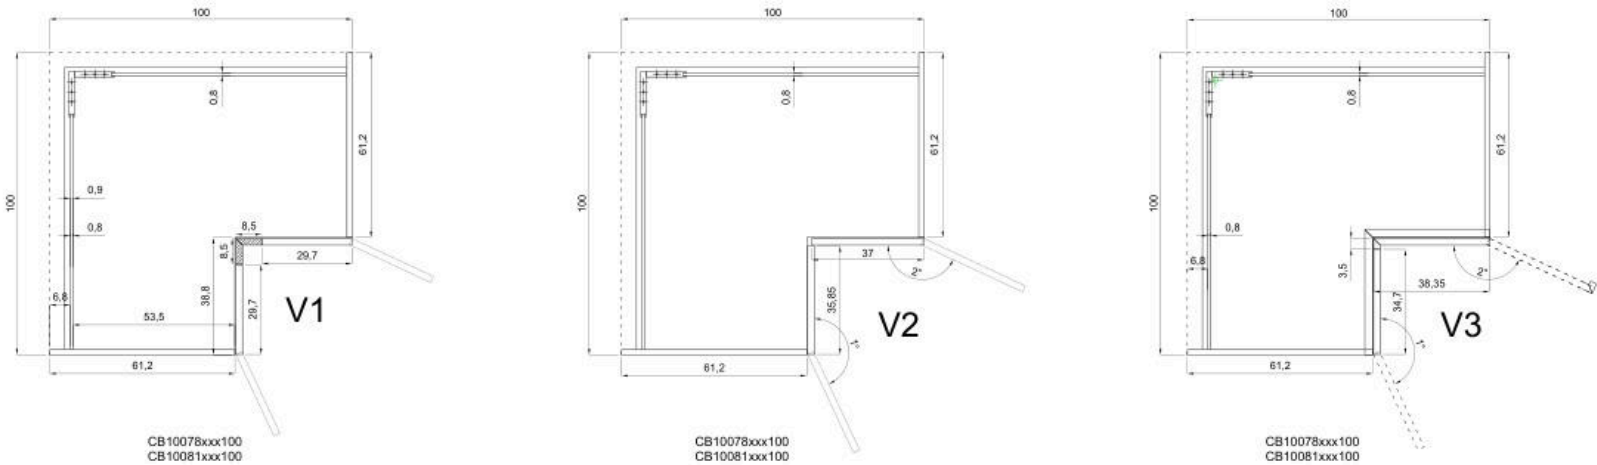

77 - Wide range of corner units

The widest range of options for corner base units, wall cabinets and tall units.

78 - Reduction of corner filler

Every corner base unit (except the 100x100) can be reduced up to 5 cm. reducing the dimension of the corner filler, without any supplement

85 - Wide range of tall units h.258

We offer the widest range of tall units with side h.258 cm., single door with shelves, for fridge, but also for oven, microwave.

87 - Corner walk-in unit

Corner walk-in unit with 1 or 2 doors for storage with shelves or to place appliances are available in several different widths.

86 - Wide range of tall units 75 cm. wide

We offer a complete range of tall units 75 cm. wide in the different heights (with shelves, for fridge, oven, microwave with vertical opening etc.). Available also with aluminum glass doors.

88 - CService column

We offer a wide range of service columns with door 1 cm. above the floor (from 75 to 90 cm.) where it is possible to place washing machines, brooms, stairs etc.

89 - Top column units with glass fronts

They are available 45, 60, 90 and 120 cm wide and 36, 39, 48, 60 cm. high

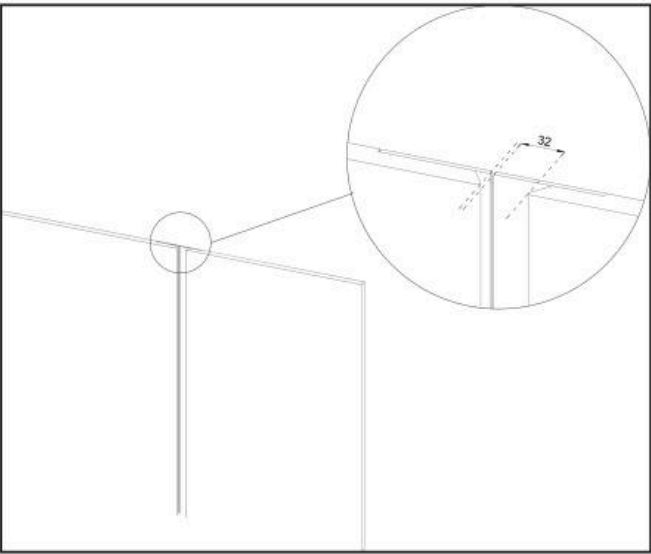

90 - Pocket (Retractable door units)

3 different types of Pocket with retractable doors:
- Pocket h. 216, 234cm (plus the height of the plinth) with single or double doors with various internal solutions with shelves and accessories,
- Pocket h.216, 234cm (plus the height of the plinth) with single or double doors 1 cm. above the floor prepared to accommodate base units and tall units inside,

100 - Solutions for wall cladding

There are plenty of solutions available to clad the wall with the same finishes of the doors, also with the possibility to insert LED lights both horizontally and vertically

101 - Living

A very wide range of cabinets specifically designed for living solutions in the same finishes available for the kitchens.

102 - Doors and walk through columns

It is possible to order walk through doors in the same finishes of the doors. They are available in the different heights with a single door th. 22 mm. for a width from 75 to 90 cm. without supplement. Openable inside and outside (pushing or pulling). As an alternative we can make real doors flush to the wall in honeycomb th. 4 cm. in any custom size with inside or outside opening (pushing or pulling) or pivotal.
